NORTH HALL

K-columns

Orange highlight below

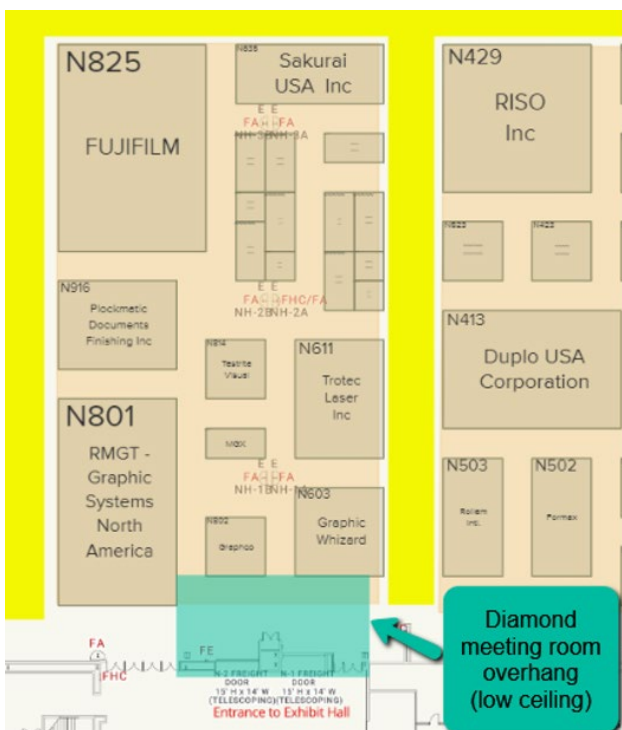

Diamond shaped meeting rooms (low ceiling) (teal highlight) cannot combine booths under these, no rigging (there are 2 in the North Hall)

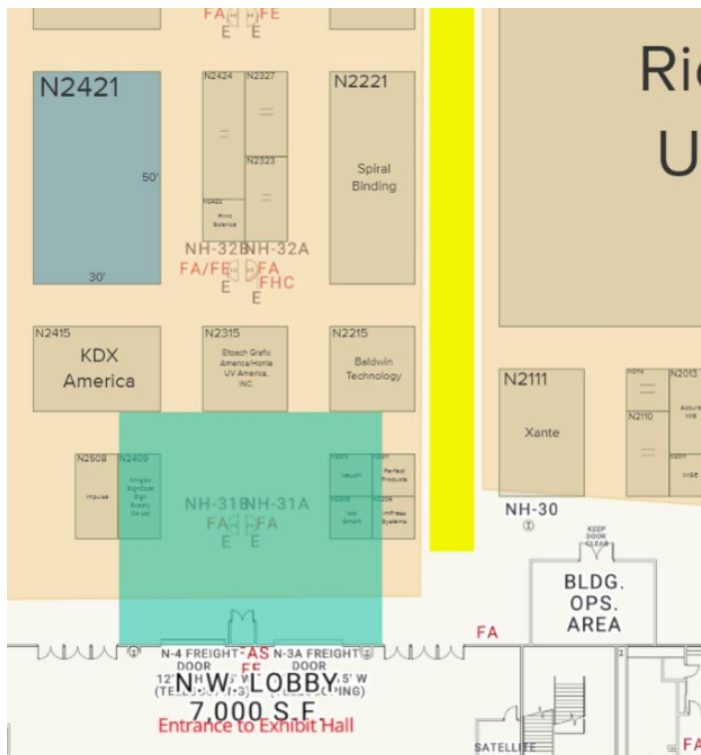

Diamond Meeting rooms are on level 2 of the LVCC, but the overhang creates a low ceiling on the Expo Floor. Highlighted in teal below.

In between N2 & N1

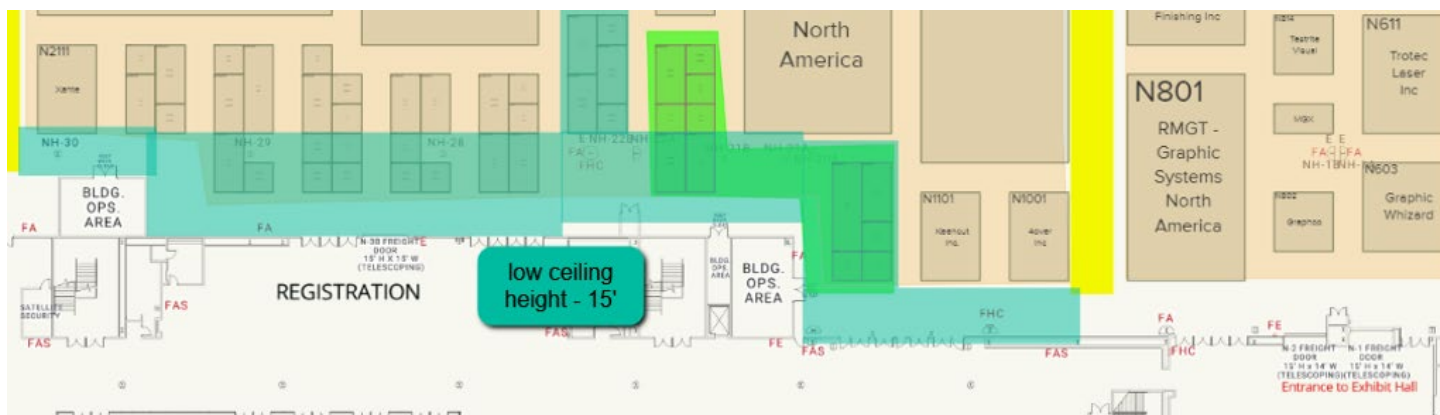

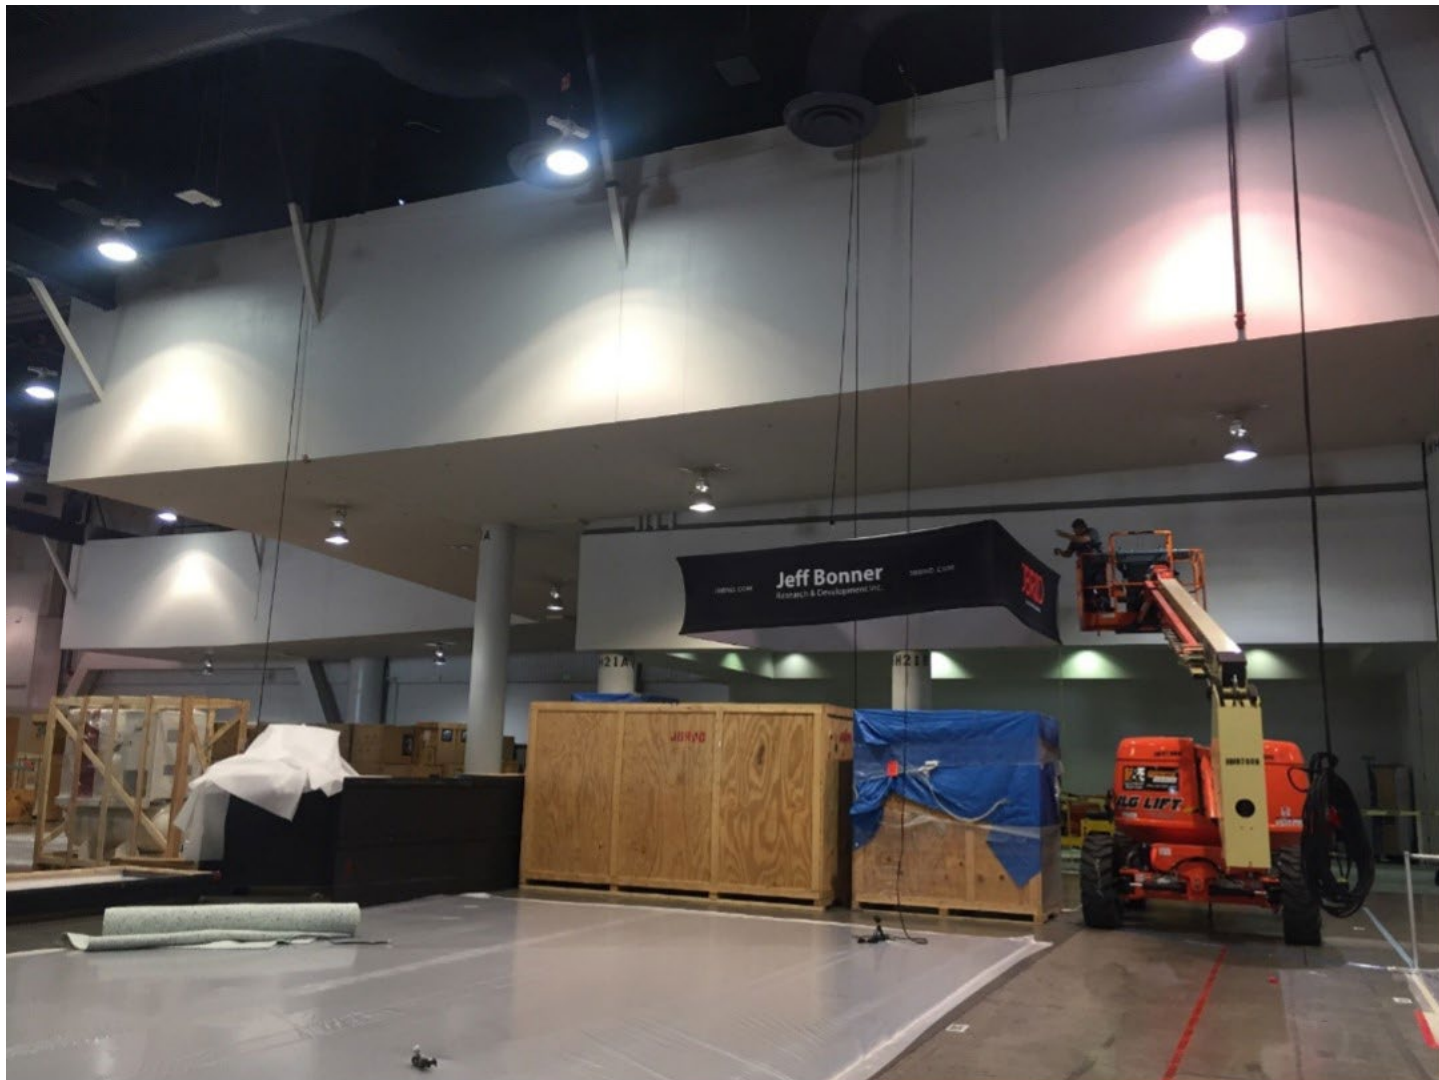

In between N4 & N3

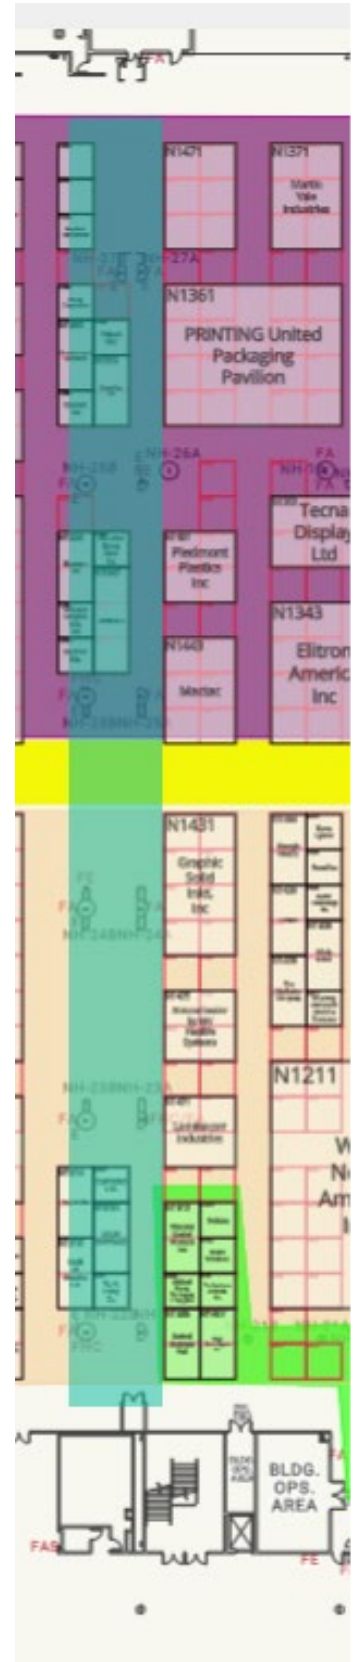

Another view of the Diamond meeting room overhang North Hall

North Hall
Overhang front of the hall

A wide-angle photograph of a large indoor exhibition hall. In the foreground, a booth area is defined by a blue curtain backdrop. Three black chairs are positioned in front of the curtain. To the left of the booth, there are several large cardboard boxes and a black equipment case on a pallet. The floor is a polished, reflective concrete. The ceiling is high and industrial, with numerous bright spotlights and large white structural beams. In the background, other exhibition areas are visible, including a wooden display counter and various equipment. A red line is painted on the floor, leading towards the back of the hall.

Soffit Areas – North Hall

(Island booths under soffits in North Hall with hanging signs will need more hanging points. Signs will need to be bridled).
Highlighted in teal
